

A young child with long brown hair is sitting at a table, focused on drawing with a stick. A pink cup is visible on the table to the right.

Children inspire our decisions, direction,  
and everything we do.

### Summary

We know that the earliest years lay the foundation for lifelong learning. Our Baby Programme is designed specifically for children under two, combining the joy of discovery with the science of child development. Each activity is thoughtfully inspired by leading theorists such as Piaget, Vygotsky, Erikson, Montessori, Bandura, and Froebel, ensuring every experience supports cognitive, physical, emotional, and social growth.

### What's Included

The Inspire Babies Programme includes sensory play, music, movement, communication, and bonding activities designed to nurture curiosity, confidence, and early development — supporting babies under two through playful exploration and meaningful, responsive interactions every day.

### Baby Learning

This structured yet flexible programme not only promotes early brain development and emotional wellbeing but also helps babies gain confidence, independence, and curiosity — key qualities for future learning. Parents can take comfort knowing their child's experiences are grounded in evidence-based practice, supporting a smooth transition from sensory exploration to active, joyful learning.
