Children inspire our decisions, direction,
and everything we do.

Summary

At Inspire Children's Day Nurseries, our Inspire Maths programme is based on the celebrated NRich initiative developed by the University of Cambridge. This programme supports deep mathematical thinking through bright, playful challenges rather than rote tasks. NRich cultivates reasoning, problem solving, pattern spotting, and confidence in thinking mathematically. Because it's backed by Cambridge mathematics educators, Inspire Maths gives children access to rich, research-informed tasks right from the start.

What's Included

Inspire Maths brings numbers to life through interactive, hands-on learning. Children explore patterns, problem-solving, and real-world maths in fun, engaging ways. Each session builds confidence, logical thinking, and a deep understanding that helps every child enjoy and excel in mathematics

Mathematical Learning

Through Inspire Maths, your child will not just "do sums" - they'll build curiosity, flexibility in thinking, perseverance, and a love for exploring mathematical ideas. It's not only about getting the right answer, but about asking questions, trying different paths, and learning to think like a mathematician from an early age.
